

Intelligent Financial Management for Growing African Businesses

A complete, double-entry accounting and financial intelligence platform — purpose-built for Nigerian and Pan-African SMEs seeking compliance, clarity, and competitive advantage.

IFRS-Aligned · FIRS VAT Compliant · AI-Powered · Multi-Currency · Real-Time Insights

Executive Overview

The Shopysh Finance Module transforms how SMEs manage money. Rather than spreadsheets and disconnected tools, it provides a unified, real-time accounting engine that automatically captures every transaction — from storefront sales to supplier payments — and presents decision-ready insights to owners and management teams. Built on internationally accepted double-entry bookkeeping principles, it is compliant with Nigerian tax law (VAT / FIRS) and designed to grow with the business from sole trader to multi-location enterprise.

Module at a Glance

17+ Finance Features End-to-end coverage	13 Report Types Printable & PDF-ready	5 AI Capabilities Forecasting, matching & more	3 Chart Templates Nigerian Standard, Simple, Retail
---	--	---	--

Strategic Value Pillars

■ Financial Accuracy & Compliance ✓ Double-entry GL ensures books never go out of balance ✓ FIRS-ready VAT Summary with AI-generated filing narrative ✓ Full audit trail — every entry timestamped and attributed ✓ IFRS-aligned chart of accounts templates	■ Operational Efficiency ✓ Auto-posting: storefront sales hit the GL without manual entry ✓ Recurring Journals eliminate repetitive data entry ✓ CSV import for bulk journal uploads ✓ End-of-Day batch posting for controlled close processes
---	---

■ Forward-Looking Intelligence

- ✓ AI Cash Flow Forecast — 30, 60, or 90-day projections
- ✓ Proactive alerts for negative cash balance scenarios
- ✓ Budget vs Actuals with AI variance explanations
- ✓ Overdue AR alerts surfaced daily on the dashboard

■ Bank & Asset Control

- ✓ AI-assisted Bank Reconciliation — auto-match transactions
- ✓ Full Fixed Asset Register with depreciation automation
- ✓ Multiple depreciation methods: Straight-Line, Reducing Balance
- ✓ Disposal workflow with complete GL treatment

Feature-by-Feature Business Benefits

■	Real-Time Finance Dashboard Owners and finance managers see Revenue, Expenses, Net Profit, Cash, AR, AP, and Fixed Asset values on a single screen — updated live. No month-end wait for financial visibility.
■	Chart of Accounts with Templates Businesses are operational in minutes using pre-built account structures. Reduces the need for an accountant to set up the system from scratch.
■	Journal Entry Engine (15 Types) Captures every transaction type in one system — sales, purchases, cash, bank, expenses, adjustments. CSV import handles high-volume entry. Draft workflow ensures review before posting.
■	Sales Book with Printable Invoices Issue professional credit invoices and receipts directly from the system. Reduces collection time and feeds AR aging automatically.
■	Accounts Receivable Aging Four aging buckets (Current, 31-60, 61-90, 90+ days) make it easy to prioritise collections and protect cash flow.
■	Accounts Payable Aging Track what is owed to suppliers, to whom, and when — avoiding late payment penalties and protecting vendor relationships.
■	Expense Management Categorised expense tracking with visual breakdown by category. Supports all payment methods including Mobile Money. CSV export for tax preparation.
■ ■	Fixed Asset Register & Depreciation Automates acquisition cost, accumulated depreciation, salvage value, and net book value tracking. Batch depreciation saves hours each month and eliminates manual errors.
■	Budget vs Actuals Tracking Set financial targets and track performance in real time. AI-generated variance explanations help management understand what is driving over- or under-spend.
■	AI-Powered Bank Reconciliation Reduces reconciliation time from hours to minutes. Auto-matches bank statement transactions to GL entries — the controller just reviews and confirms.
■	AI Cash Flow Forecast Predicts future cash balances up to 90 days ahead. Enables proactive cash management rather than reactive crisis response.
■	13 Printable Financial Reports Trial Balance, Income Statement, Balance Sheet, VAT Summary, Sales Book, Purchase Book, Cash Book, Bank Book, Expense Report, Fixed Assets Register, Inventory, Budget vs Actuals, Bank Reconciliation — all print-ready with company header.
■	Recurring Journals Automates rent, loans, salaries, and other repetitive entries — eliminating manual monthly effort and reducing missed entries that distort financial statements.

Multi-Bank Account Support

Manage multiple bank accounts in one place with per-account Bank Book reports and running balances — critical for businesses operating across multiple banks or mobile wallets.

Regulatory & Tax Compliance

VAT / FIRS Compliance Automatically tracks Output and Input VAT. VAT Summary report calculates net payable to FIRS. AI generates professional FIRS return narrative ready for submission.	Audit-Ready Records Every transaction has a full audit trail — user, timestamp, entry number, and linked journal lines. Trial Balance and GL can be exported for external auditors at any time.	IFRS-Aligned Accounts Nigerian Standard chart template follows IFRS classification. Financial statements produced are immediately recognisable to banks, investors, and auditors.
