

Intelligent Financial Management for Growing African Businesses

A complete, double-entry accounting and financial intelligence platform — purpose-built for Nigerian and Pan-African SMEs seeking compliance, clarity, and competitive advantage.

IFRS-Aligned · FIRS VAT Compliant · AI-Powered · Multi-Currency · Real-Time Insights

Executive Overview

The Shopysh Finance Module transforms how SMEs manage money. Rather than spreadsheets and disconnected tools, it provides a unified, real-time accounting engine that automatically captures every transaction — from storefront sales to supplier payments — and presents decision-ready insights to owners and management teams. Built on internationally accepted double-entry bookkeeping principles, it is compliant with Nigerian tax law (VAT / FIRS) and designed to grow with the business from sole trader to multi-location enterprise.

Strategic Value Pillars

■ Financial Accuracy & Compliance ✓ Double-entry GL ensures books never go out of balance ✓ FIRS-ready VAT Summary with AI-generated filing narrative ✓ Full audit trail — every entry timestamped and attributed ✓ IFRS-aligned chart of accounts templates	■ Operational Efficiency ✓ Auto-posting: storefront sales hit the GL without manual entry ✓ Recurring Journals eliminate repetitive data entry ✓ CSV import for bulk journal uploads ✓ End-of-Day batch posting for controlled close processes
■ Forward-Looking Intelligence ✓ AI Cash Flow Forecast — 30, 60, or 90-day projections ✓ Proactive alerts for negative cash balance scenarios ✓ Budget vs Actuals with AI variance explanations ✓ Overdue AR alerts surfaced daily on the dashboard	■ Bank & Asset Control ✓ AI-assisted Bank Reconciliation — auto-match transactions ✓ Full Fixed Asset Register with depreciation automation ✓ Multiple depreciation methods: Straight-Line, Reducing Balance ✓ Disposal workflow with complete GL treatment

Feature-by-Feature Business Benefits

■ Real-Time Finance Dashboard Revenue, Expenses, Net Profit, Cash, AR, AP, and Fixed Asset values on a single screen — updated live. No month-end wait for financial visibility.
■ Chart of Accounts with Templates Businesses are operational in minutes using pre-built account structures. Reduces the need for an accountant to set up the system from scratch.
■ Journal Entry Engine (15 Types) Captures every transaction type in one system. CSV import handles high-volume entry. Draft workflow ensures review before posting.
■ Sales Book with Printable Invoices Issue professional credit invoices and receipts directly. Feeds AR aging automatically and reduces collection time.
■ Purchase Book & Vendor Management Track supplier bills, payments, and debit notes with vendor master records linking outstanding balances and tax IDs.
■ Cash Book & Bank Book Per-account running-balance ledgers — ready for printing or sharing with auditors.
■ Accounts Receivable Aging Four aging buckets make it easy to prioritise collections and protect cash flow.
■ Accounts Payable Aging Track what is owed to suppliers and when — avoiding late payment penalties.
■ Expense Management Categorised tracking with visual breakdown. Supports Mobile Money. CSV export for tax prep.

Fixed Asset Register & Depreciation Automates acquisition cost, accumulated depreciation, salvage value, and net book value. Batch depreciation saves hours monthly.
Budget vs Actuals Tracking Real-time targets vs performance. AI-generated variance explanations for management.
AI-Powered Bank Reconciliation Reduces reconciliation from hours to minutes with AI auto-matching.
Recurring Journals Automates rent, loans, salaries — eliminating manual monthly entry.
13 Printable Financial Reports Trial Balance, P&L, Balance Sheet, VAT, Sales Book, Purchase Book, Cash Book, Bank Book, Expenses, Fixed Assets, Inventory, Budget, Bank Recon — all print-ready with company header.

Regulatory & Tax Compliance

VAT / FIRS Compliance Automatically tracks Output and Input VAT. VAT Summary calculates net payable to FIRS. AI generates a professional filing narrative.	Audit-Ready Records Full audit trail per transaction. Trial Balance and GL exportable for external auditors at any time.	IFRS-Aligned Accounts Nigerian Standard chart follows IFRS classification — immediately recognisable to banks, investors, and auditors.
---	---	--

Return on Investment

Up to 80%	Time Saved on Reconciliation AI auto-matching eliminates manual line-by-line bank statement comparison
3× Faster	Month-End Close Recurring journals and auto-posting remove repetitive manual steps
Significant	Reduction in Overdue Receivables Daily AR alerts and aging buckets drive faster collections
Instant	Financial Reporting Readiness 13 reports on demand — no wait time for board packs or audit prep
